ELLEN DE MAN

gallery

In 1989 I bought my first Arabian Horse. That first Arab had a big impact on my life because at that moment I got the well known Arabitis virus. Soon more Arabian horses filled my stables, mostly of Spanish or Spanish-related bloodlines. My most successful horse was the Spanish mare Mel Quelinka (Calero x Mel Linaka) who won several national and international titles in the show ring and is also the mother of former World champion Basara Saiyana M (Mel Nebli). Some Christmas morning I found a nice camera under the Christmas tree. It started a new passion. I was always surrounded by animals so subjects to photograph weren't difficult to find. A new passion was born. I loved to combine my passion for photography with my love for animals. I took things quite serious. I took classes and workshops in photography, graphic design and I just started classes in Desktop Publishing. That way I can provide more service than just photography. I think my experience with horses makes me see the strong assets of a horse and I try to capture that in a photo. q
