

MARTIN KUBAT GALLERY

Martin Kubat, born in 1968, an enthusiastic amateur photographer, lives since birth in the scenic Loreley Rhine valley between the cities Frankfurt am Main and Cologne. With the acquisition of its first Camera 1990, he photographed mainly the beauty of nature and landscape of his home region. The interplay of colours in the line of the 4 seasons fascinated him from the beginning. These were the first recordings of majestic Birds of prey which he took pictures in different natural parks in the course of time. Around the mid 90' he visited the nearby Kauber Platte Stud, where he first came into contact with Arabian Horses. Henceforth, the noble creatures of the desert inspired him more and more, much visits to traditional Studfarms in Germany and Europe allowed the camera as often as it was used in his spare time. The Photo archive of Arabian horses began to steadily expand, even more so than the first traveling to countries such as Qatar, Egypt, Kuwait came to conditions, the proverbial Arab hospitality gave him an insight into the heritage and culture of this unique horse
